what's up?

Polanik in Brazil! Several months ago we have supplied equipment for the [European Championships in Ostrava](#), then our hammers were present at the [World Championships in Daegu](#)... Our equipment goes to the markets of 70 countries of the world, now this group will also join Brazil, where we will fully equip athletics arena, where potential Olympic champions will train! – *Our market is rather niche. We do our best to look for distributors worldwide. So that we have made some steps in Brazil, where in 2016 will be held the Olympic Games in w Rio de Janeiro. Few months ago we have contacted the university in Belo Horizonte.* There is created a huge sports complex for the Olympics. It will not be only the object for Brazilian athletes to prepare for the Games but also a place for acclimatization for other competitors before direct performance at the Olympics - says Dariusz Szczepanik, Polanik President. We are going to equip that arena in absolutely everything what is necessary for the athletics. Throwing equipment (javelins, shot puts, hammers, discus) hurdles, high jump sets, landing areas, take-off boards, markers, starting blocks. And even more, because our contractor wants complex service.

We completed the project: "**Polanik's sp. z o.o.'s participation in the international trade fairs ISPO and FSB 2011**" co-financed by the European Union from the European Regional Development Fund (and the national budget of the Republic of Poland) Thanks to the project we have received funding for the organization of our participation in two fairs: [ISPO in Munich](#) and the [FSB in Cologne](#). This year's edition of the ISPO was unique, because of the absolute record - up to 25% increase in visitors and a higher number of exhibitors - nearly 2 300 companies. On the fair we have presented a wide range of 80 products, among them many news such as a new line of javelins Space Master, Sky Challenger and Air Flyer. FSB gathered 600 exhibitors from over 40 countries around the world - our company has presented more than 20 products, including innovative: carbon javelins, electronic pole vault stand and new competition clothes. We are very grateful for many successful meetings!
